Safety System -The company

We have developed and manufactured the showjumping fences since 1989. From the very beginning, our aim was to make safe showjumping fences, and because of this we have made a number of improvements to our fences compared to traditional ones. Development of products and materials are an ongoing process in consultation with several professionals and organisations in equestrian sport.

Safety System – A unique concept

One of the cornerstones of Safety Systems fence products is the unique cup, which not only makes jumping a safer activity, but also greatly facilitates the adjustment of fence heights.

The material in Safety Systems barrier material consists of HD polythene, UV resistant and works equally well in hot and cold climate. The material is also totally maintenance free and the poles, stands etc can be left outside unprotected without deteriorating. The feet of all stands is made of hot-dipped galvanised steel, which gives them a very long lifespan.

The plastic is 100 % recyclable!

Safety System – Endless combinations

With Safety Systems fence products you have an almost endless variety of combinations available, which allows you to build many different fences in a costefficient way.

Safety System - for professionals and amateurs

Safety System products is used by both professionals and amateurs and work equally well for jumping practice as for competitions. They come in a variety of colours too, which adds to their versatility.

Safety System-3 year materials warranty

Safety System leaves 3-year warranty on all of the plastic details.

Maintenance-free

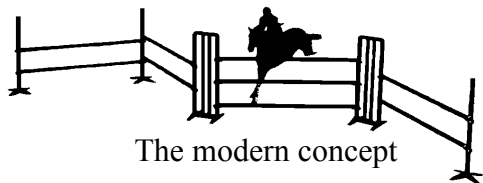

Since the fences are made of plastic you will need to spend very little time on maintenance of the material and therefore have more time for training. All of our stands and plastic covered poles are waterproof and can be cleaned with high pressure wash.

Easy to handle

As a result of the careful consideration given to construction and manufacturing, our fence products are lightweight. This enables you experiment and try different combinations with much less effort. Despite its low total weight is Safety Systems stands more stable than conventional stands. All 80 % of the weight is concentrated in the base of the stand.

CUPS

Safety-System cups part number 0100

Safety-System own design Cups.
Easy-to-handle safety scypts for sliding height adjustment. The own designed cup can be twisted into 12 different positions, wich makes it possible to set up poles in different directions from one stand.
The safety feature will cause the cup to slide down the stand if pressure is put on it, which lowers the risk of damage to horse and rider.
The cup features two different depths, one for practice and one for competition

Cups for keyholdstrips

2814 Nyloncups

2836 Adapter for nyloncups

2835 Complete safetycup

Part number 2814 and 2836 are included in the safetycup.

With our new intergrated system you can choose what cup to use and increase the versatility.

Approved by FEI.

KEYHOLDSTRIP of aluminium. Part number 2800

SINGLESTAND, traditionell model.

0200	White
0201	Yellow
0202	Green
0203	Blue
0204	Red
0206	Brown
0207	Purple
0208	Pink
0209	Silver
0210	Gold

These stands are more stable than traditional stands because of its low enter of gravity of the stand construction. The design is such that 80% of the weight is in the base of the stand!

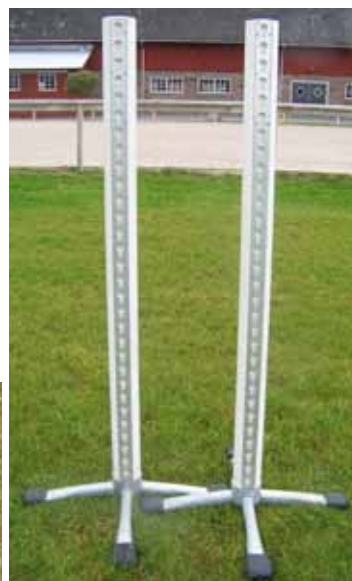

Safety-System

SINGLESTAND, new model with intergrated keyholdstrip
Nylon and our own designed cup works for this stand.

0220	White
0221	Yellow
0222	Green
0223	Blue

Short Singlestand, 120 cm.

0240	White
0241	Yellow
0242	Green
0243	Blue
0244	Red
0246	Brown
0247	Purple
0248	Pink
0249	Silver
0250	Gold

Telescopicstand

0270	White
------	-------

Wing. Traditionel model

Only our own designed cups work. Colours listed below are for the frames. Colour on the middle pipes can be choosed between the same colours as listed below and black.

0300	White
0301	Yellow
0302	Green
0303	Blue
0304	Red
0306	Brown
0307	Purple
0308	Pink
0309	Silver
0310	Gold

Safety-System

Wing. Bew model with intergrated keyholdstrip

Nylon and our own designed cup works for this stand. Colours listed below are for the frames.

Colour on the middle pipes can be choosed of all our colours

0320	White
0321	Yellow
0322	Green
0323	Blue

On these wings you can use nylon cups on both sides, aswell as our own designed cups on both sides at the same time. Which gives an anormous versality when building jumps.

POLES

Safet System poles consist of a wooden inner protected by a plastic outer cover thus ensuring a long life. The protective end cover is sealed to ensure weather - resistance.

Plastic covered woodenpole 3,0 m.

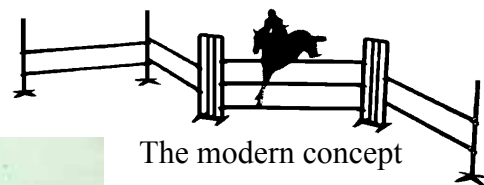

0400	White
0401	Yellow
0402	Green
0403	Blue
0404	Red
0406	Brown
0407	Purple
0408	Pink
0409	Silver
0410	Gold

Also avaliabile in 3,5 and 1,75m lenght.

Safety-System

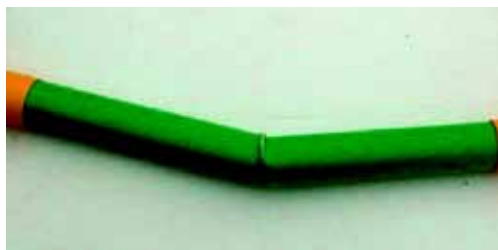

The modern concept

Safety . To increase the safety, Safety System has developed a process for covering wooden poles with a plastic sleeve.

The poles still have the 'feel' of traditional wooden ones, and function as such, but they won't splinter if they are broken.

If a plastic-sleeved pole is indeed broken, neither horse nor rider will be hurt by splinters as the elasticity of the plastic material will ensure the wooden pole stays enclosed.

Compare breaking an uncovered pencil with a pencil covered in a plastic sleeve.

Coloursleeves

0610	White
0611	Yellow
0612	Green
0613	Blue
0614	Red
0615	Black
0617	Purple
0618	Pink
0619	Silver
0620	Gold

The coloursleeves are easily pulled over the poles.

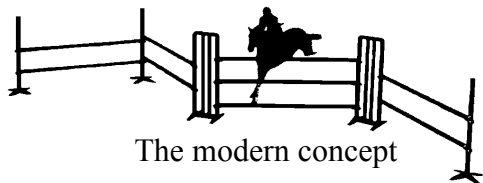

PLANK

Plank 3,0 m x 20 cm x 5 cm.

0480	White
0481	Yellow
0483	Blue
0484	Red
